Conclusion

OWNER CAN SET FEES UP TO 49%

```
function setFees(uint256 _liquidityFee, uint256 _rewardFee, uint256 _marketingFee, uint256 _teamFee, uint256 _devFee, uint256 _burnFee, uint256
_feeDenominator) public onlyOwner {
    liquidityFee = _liquidityFee;
    rewardFee = _rewardFee;
    marketingFee = _marketingFee;
    teamFee = _teamFee;
    devFee = _devFee;
    burnFee = _burnFee;
    totalFee = _liquidityFee + _rewardFee + _marketingFee + _teamFee + _burnFee + _devFee;
    feeDenominator = _feeDenominator;
    require(totalFee < feeDenominator/2, "Fees cannot be more than 49%");
}
```

OWNER CAN SET BLACKLIST

```
function enable_blacklist(bool _status) public onlyOwner {
    blacklistMode = _status;
}
```

Smart contract contain 1 low severity issue:

1. Out of gas

Issue:

Manage_blacklist()

The function manage_blacklist() uses the loop to change blacklist status of addresses.

If also could be aborted with OUT_OF_GAS exception if will be a long addresses list.

Recommendation:

Check that the array length is not too big.
